The Rolls Royce of Badges

In 1939 Entenmann-Rovin introduced their "Carltone" Gold and "Platily" silver alloy metals. These depth-tone metals were especially formulated to give our gold badges the look of rich, solid gold and our silver badges the silvery richness of platinum and eliminating the need for superficial plating. A few of the benefits are:

- Reasonable Initial Costs
- Can be Welded at High Temperatures
- Beautifully Embossed
- Reasonable Maintenance Costs
- Tough and Enduring
- Chases and Engraves Richly
- French Cloisonné High Temperature Enamels

Do not confuse our designs and quality with imitations. We offer actual samples of our badges for your inspection and testing so that you will not be confused by substitutions.

Our constant concern is to offer the greatest value of beauty, cost and endurance to you and to our many friends who have reciprocated with their loyalty and recognition of our leadership, and for this, we would like to thank you all.

Respectfully

Entenmann-Rovin Co.
